

## PRESS RELEASE

### National Awareness and Promotional Event in Slovenia

28<sup>th</sup> participants joined the National Awareness and Promotional Event on 7<sup>th</sup> of April in NE part of Slovenia, the region called Goricko.

The purpose of the event was to present the “Innovagro Plus” international cooperation project funded under the INTERREG ADRION program, the cooperation activities and the main outcomes and results. Part of the event was a study visit to nature protected area with biodiversity-friendly measures in agriculture. The participants learned the role of biodiversity in agriculture and the strong interrelation of agriculture and biodiversity.

The event was very important for exchanging the knowledge and the experiences among the participants. Due to the high interest of the participants the themes discussed at the event are now presented as new E-Learning topics available on VIBIEC platform.
